smartrak.ai

A comprehensive solution for Lifecycle Management

Shared Visibility

A shared view of the Cisco universe with PDT, enhancing collaboration and enabling more efficient asset and contract management.

Consolidated Inventory Managment

Consolidate Cisco inventory using Install Base Reports, CCW-R, and CSPC, providing a complete view of Cisco business assets in one location.

Streamlined Renewals

Facilitate an efficient renewal process, track contract and subscription renewals, and ensure all assets receive necessary support.

Comprehensive Reporting

Reports analyze Cisco business investments, helping customers understand spending patterns and identify cost reduction opportunities.

Manage renewals, find cost-saving opportunities, and plan for technology updates, ensuring future preparedness.

EA Visibility

Gain effortless control over all **EA subscriptions**. Instantly view up-to-date usage—**data updates automatically**, eliminating manual tracking. Spot **over/under consumption** and see upcoming **True Forwarding** dates so you can proactively plan ahead.

SmartMap Technology

The SmartMap feature helps customers track **contract & subscription renewals, LDOS events, upgrade options**, and **over-consumed subscriptions**. It also provides a path to explore **sustainability** options for their technology refresh requirements.

Proactive Budgeting

Using the **SmartBudget** tool, customers can plan for **End of Life (EOL) events** up to 5 years in advance. This advanced planning capability gives organizations the foresight to allocate budget for necessary upgrades and avoid financial surprises.

Technology is complex.
Great relationships are not.®
